4/5	9 Some of the Sericultural Coop. societies have been engaged in this work from 1926-27. From the statement of work done by them as furnished by the Dir it will be seen that the work of these societies are very far from the minimum prescribed to entitle them to a bonus. The Dir attributes this to a lack of enthusiasm on the part of the hon. Secretaries. To stir up their enthusiasm it would perhaps be better to adopt the lower minimum suggested by the Provincial Co-op. Conference and fix the bonus at a lower figure say Rs 2 4/5 to

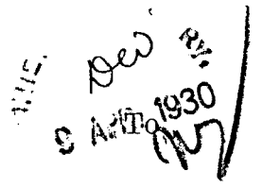
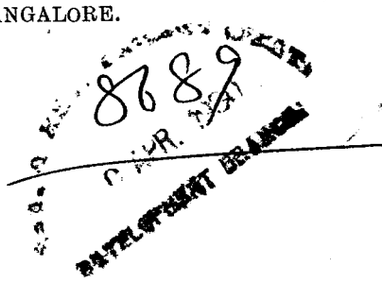
REGISTRAR OF CO-OPERATIVE SOCIETIES IN MYSORE,
BANGALORE.





N. Rama Rao, Esq., B.A., B.L.,
Secretary to Government of Mysore,
Development Departments,
Bangalore.

Sir,

I have the honour to forward herewith a copy of resolution on the marginally noted subject passed at the 16th Mysore Provincial Co-operative Conference held at Mysore during October 1929 and to state as follows:-

Sericultural Co-operation.

A. Government have in their order No.D.8848-9/Seril 27-27-5 dated 27th February 1928, sanctioned certain concessions for the development of the scheme of private grainages. One of the conditions prescribed therein is that the grainages should prepare only pure Mysore Seed no less than 50,000 layings in a year. Government have, in their Order No.D.2216-17/Seril.7-29-2 dated 26th August 1929, sanctioned the grant of the concessions under the scheme to the Mogenahalli Sericultural Co-operative Society which has a trained staff. But is is felt by the societies that the fixing of the production at 50,000 layings works as a great hardship, and that it may be reduced to 25,000/- instead, as resolved at the Conference. Many societies are deputing their own men for training in seed selection work, and it will be a great inducement to the societies if the ~~maximum~~ minimum production to entitle the grant of a bonus under the scheme is fixed at 25,000/- layings.

I therefore request that Government may be pleased to view the resolution favourably and modify the Government Order on the aided grainages scheme so as to entitle societies producing 25,000 layings to the bonus.

I have the honour to be,

Sir,

Your most obedient servant,

K.H. Ramaiya

Registrar.

SUBJECT:- Sericultural Co-operation.

Resolved that Government be requested to reduce the minimum number of Disease Free layings from 50,000 to 25,000 in the societies to entitle them to get the bonus that has been sanctioned by Government in this connection.

OFFICE OF THE DIRECTOR,

Dated, Bangalore, 26th September 1930.

Seri. 110-29-3

FROM

C. RANGANATHA RAO SAHIB, Esq., B.A., B.L.,
Director of Industries and Commerce in Mysore,
(Bangalore, India.)

To

B. Narayanaswami Iyengar, Esq., B.A., B.L.,
Secretary to the Government of Mysore,
Development Departments, Bangalore.

SIR,

With reference to your letter No.D.12580/Seri.110-29-2 dated 12-5-1930 I have the honour to submit for the information of Government a statement ~~shwg~~ showing the number of Disease Free Layings prepared in each of the Sericultural Cooperative Societies from the year 1926-27. The Grainage work so far done in most of these Societies is not satisfactory as the layings prepared by them do not even meet the requirements of the members in full. The Superintendent of Sericulture reports that this slackness of work is due to the lack of - on the part of - interest ~~in~~ the Honorary Secretaries. Efficient management of Grainage work involves a good deal of responsibility on the Secretaries for which they do not at present get suitable remuneration.

It is necessary to improve Graingage work in all the Societies early. The Secretary or the member who looks after Grainage work in these Societies should be a trained man and should be given suitable remuneration. I have instructed the Superintendent of Sericulture to select proper men for work at these Societies and get them trained in the Government Grainages.

I am not in favour of reducing the minimum to 25,000 layings for purposes of giving bonus to the Societies. The person in charge of this special work can only expect suitable remuneration if the Disease Free Layings reach at ~~best~~ least one lakh. To reduce the limit for a Co-operative Society below that fixed even for a private Graingage would

would be to remove all inducement for rapid development of work. The minimum of 50,000 already fixed for a private Aided Grainage is very small considering the minimum requirements of the smallest Sericultural village and the Sericultural Co-operative Societies should be able to supply more than 50,000 layings in a year when the Grainage work is managed by a competent person who is trained for his work. The Sericultural Cooperation staff of the Department, will, while inspecting the work of these Societies give all the technical advice and assistance necessary to enable the Societies to achieve this result.

I enclose copy of the letter received from the Superintendent of Sericulture on the subject.

I have the honour to be,
Sir,
Your most obedient servant,

V. Rangaiah Naidu

DIRECTOR.

TO

C. Ranganatha Rao Sahib, Esq., B.A., B.L.,
Director of Industries and Commerce in Mysore,
BANGALORE.

SUBJECT AND REFERENCE—

SIR,

With reference to your No. D4-1505/29-30 of 16-5-1930 forwarding to me copy of letter No. D 12560/ Seri. 110-29-2 of 12th May 1930 from the Development Secretary to Government regarding minimum number of layings to be prepared by each Sericultural Society to earn bonus as an Aided Grainage, I have the honour to submit herewith a statement showing the number of layings prepared by each society since 1926-27.

It is seen from the statement that the layings prepared in the societies ~~is~~ are not enough to meet even the deamd from the members only as some of the societies have more than 20 members. The main object of the society is to see that all the members are supplied with dis-ease free layings for each of the rearings during the year. But inspite of the guidance of the staff of the Sericultural Co-operation section , very few societies are preparing layings to meet the requirements of all the members for all the crops. The Societies some-times obtain layings from Government Grainages for the use of members and some-times the members themselves obtain layings direct from Government Grainages.

The number of layings prepared in each society so far, cannot be taken to be the full capacity of each society as the honorary secretaries are not enthusiastic enough to secure good seed cocoons, prepare layings and distribute to the members in time. This is due to the fact that the work of these secretaries is purely Honorary and these secretaries do not get any bonus as the amount of profit earned by each society is very little.

It was with the object of enabling the societies to earn profits to pay some bonus to the secretary or any other enthusiastic working member that proposals were submitted to recognise the sericultural societies also as Aided Grainages. The societies at Sidlaghatta and Nellur have been supplied with grainage appliances in April 1930 and these societies have been developing seed production work with much earnestness.

I feel confident that the societies can prepare and supply a large number of disease free layings when they realise that the working members will be remunerated. This remuneration can be paid out of the profits earned by the society.

The Sericultural Societies are situated in sericultural villages and in the midst of sericultural villages. At the Officers meeting held on 30-9-1929, it was decided that the societies may supply layings to non-members also. This fact also has been intimated to the several societies.

In view of the great demand for disease free layings and the favourable situation of the Sericultual Co-operative Societies I feel that these societies also should be paid bonus if each society prepares and distributes at least 50,000 layings per year. I do not think there is any need to lower the minimum from 50,000 layings to 25,000.

I have the honour to be,
Sir,
Your most obedient servant

W. Thimmiah
